ORDERING INFORMATION:

To order any of our fine Spinnaker Products call, 9–6 p.m. Eastern Standard time, Monday–Friday.
TOLL FREE: 1/800-826-0706
[Mastercard and Visa accepted]

If you prefer to order by mail, send us a letter stating the name of the program you wish to purchase and the type of computer you own. Please specify 5¼" disk or 3½" disk (if available). Enclose a check or money order for the total amount, which includes: Price of program(s); $3.50 for shipping and handling; and 5% sales tax (MA residents only).

WARRANTY:

We at Spinnaker Software Corp. stand behind our products! If your program fails to work within 30 days of purchase, please return the defective disk(s) with a brief note of explanation, and a copy of your purchase receipt. We will gladly replace the defective disk(s) at no cost. If your program disk(s) becomes damaged at any time, replacement is attainable at a charge of $5.00.

CUSTOMER SERVICE:

If you have questions regarding Spinnaker Software products, please write to us, or call between 1–6 p.m. Eastern Standard time, 617/494-1220. We'll be happy to answer any questions you have! *Contact:*

SPINNAKER®

Dear Friend:

What is a good product from the user's perspective? At Spinnaker, that is the first and most important question we ask ourselves when we are developing a new software package, and we believe that value and innovation make the product.

We're not here for the power user who revels in complexity. Our aim is to produce high quality programs that are full featured, obvious to use and affordably priced. But we're not perfect.

In order to give you, the consumer, exactly what you want, we need to hear from you. I read every letter that users like yourself address to me. I am convinced that this industry would be much stronger if those of us making software did a better job of designing it for those who use it. With your continued support, I am confident that we can produce better and better programs that give you real value for your dollar.

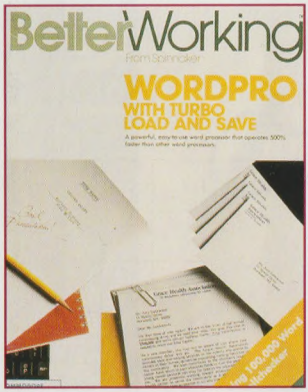
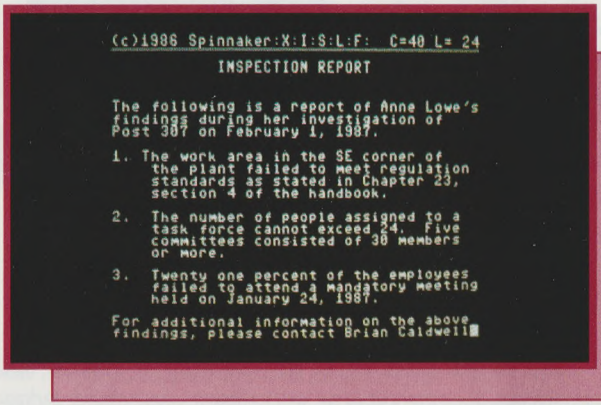
BETTERWORKING **WORDPRO** with Turbo Load and Save





(c)1986 Spinnaker:X:I:S:L:F: C=40 L= 24
INSPECTION REPORT
The following is a report of Anne Lowe's findings during her investigation of Post 307 on February 1, 1987.
1. The work area in the SE corner of the plant failed to meet regulation standards as stated in Chapter 23, section 4 of the handbook.
2. The number of people assigned to a task force cannot exceed 24. Five committees consisted of 30 members or more.
3. Twenty one percent of the employees failed to attend a mandatory meeting held on January 24, 1987.
For additional information on the above findings, please contact Brian Caldwell

"state of the art . . . features undreamed of"
COMMODORE Microcomputers

". . . one of the best word processors on the market . . . has many features of the largest word processing systems."
The Microcompatible Magazine

". . . fast and efficient"
COMPUTE! Publications

This sophisticated word processor features a unique high speed disk operating system, a powerful spellchecker, and advanced features not found even in high priced word processors.

Unlike other word processors, WORDPRO WITH TURBO LOAD AND SAVE operates with lightning speed. There's no more endless waiting for the disk drive to load or save text. Because included in this package is the TURBO LOAD AND SAVE cartridge which, when used with the enclosed WordPro disk, speeds up the operation of your disk drive by 500%!

In addition, WORDPRO features full text editing and formatting functions such as search and replace, double columns, headers, footers, document chaining and personalized form letter mailings. WORDPRO lets you easily compose documents and check them for accuracy using the program's 100,000 word spellchecker. Plus, it supports over 100 printers with such features as preview, custom printer set-up and proportional spacing with right justification. It's a great word processor.

But especially it's super fast—how much is your time worth?

- Full 40/80 column text editing functions such as insert, delete, search and replace, and automatic word wrap.
- Complete text formatting functions including margin set, indent, tabbing, centering, highlighting, underlining, double columns and more.
- Full documentation functions such as unlimited documentation length, automatic page numbering, headers, footers, document chaining and personalized form letter mailings.
- 100,000 word spellchecker which can be customized with proper names, addresses or special words to personalize the dictionary to meet your needs.
- Super fast disk drive operation—500% faster than other word processors.
- Interfaces with BetterWorking FILEPRO 64 to allow automatic generation of mass mailings from address records.
- Supports over 100 printers with preview, customized printer set up, and proportional spacing with right justification.
- Not copy protected so back up copies can be made hassle-free.

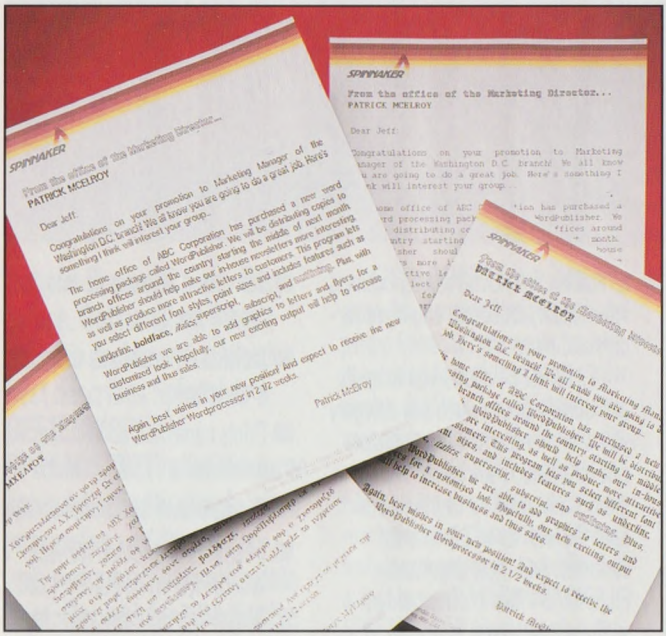
WORDPROCESSING with FONTS

You can access more fonts . . . more typestyles . . . more features. With WORD PUBLISHER you can use up to nine fonts and six typestyles per page. The typestyle option includes **boldface,** *italics,* **outlining,** underlining and reversed print. WORD PUBLISHER will jazz up your newsletters, memos, flyers, ads, and correspondence. Use either the cursor keys or a mouse to move around your document to select editing and formatting options such as center, right and full justification; single and double spacing; super- and sub-script; tabs; headers; footers; pagination; cut, copy, and paste; search and replace; wordwrap, and much more. And WORD PUBLISHER'S composition mode allows for rapid entry of text–**up to five times faster than other GEOS word processors.** Once your document is complete, spell check it with the 100,000 word spellchecker that catches 99% of all spelling errors. Next, go to the View mode for a "What You See Is What You Get" display, then print directly to disk or printer in either a fast, draft, or quality output.

And that's not all! WORD PUBLISHER gives you a unique option for chaining files, so there's no limit to your document size. Plus, complete compatibility with geoPaint and geoFont allows you to import additional fonts or graphics into your documents. You can even place multiple graphics within the same line!

- Rapid text entry in composition mode.
- Access of up to nine fonts and six typestyles per page.
- Compatible with geoPaint and geoFont for additional fonts and graphics.
- Includes 100,000 word Spell Checker.
- Full text editing and layout options.
- Mailmerge for mass mailings.
- View Mode for a "What You See Is What You Get" display.
- Choice of Fast, Draft, or Quality printouts.
- Supports over 100 printers.

GEOS, geoPaint and geoFont are trademarks of Berkeley Softworks.



SPINNAKER
From the office of the Marketing Director...
PATRICK MCELROY
Dear Jeff:
Congratulations on your promotion to Marketing Manager of the Washington D.C. branch! We all know you are going to do a great job. Here's something I think will interest your group.
The home office of ABC Corporation has purchased a new word processing package called WordPublisher. We will be distributing copies to branch offices around the country starting the middle of next month. WordPublisher should help make our at-Home newsletters more interesting as well as produce more attractive letters to customers. This program lets you select different font styles: bold, italics, superscript, subscript, and underline. Plus with WordPublisher we are able to add graphics to letters and flyers for a customized look. Hopefully, our new exciting output will help to increase business and thus sales.
Again best wishes in your new position! And expect to receive the new WordPublisher Wordprocessor in 2 1/2 weeks.
Patrick McElroy

FILEPRO 64 is *the* data management program for all of your home and/or small business needs. It allows fast and easy entry, retrieval and organization of a variety of data such as mailing lists, club records, business information, collection, employee records and more.

FILEPRO 64 allows you to easily and quickly cross-search any category you want in order to locate the specific information you need. The program's advanced sort system sorts each file with up to 20 different variables. And most importantly, FILEPRO 64 files in sorted order, so there's no re-sort time.

In addition, FILEPRO 64 offers a powerful and versatile report generator for personally designed reports which can be incorporated into any written document produced by WORDPRO word processor.

- Stores and accesses up to 4,000 records per file.
- Individually addresses and prints form letters.
- Prints name and address files onto standard mailing labels.
- Supports over 100 printers.
- Interfaces with BetterWorking WORDPRO WITH TURBO LOAD AND SAVE word processor to allow automatic generation of mass mailings.

"Simple. Powerful. Fast. Easy-to-use. Outstanding. I can't seem to decide which word best describes Spinnaker's BETTERWORKING SPREADSHEET, a full-featured spreadsheet with simple word processing and the search-and-sort capabilities of a data base. But whichever adjective I finally choose, Spinnaker's first in a series of home and small-business applications software is a winner."

Commodore Microcomputer Magazine

SPREADSHEET is the ideal program for planning budgets and preparing financial statements, as well as creating text and organizing information. It is fast, versatile and easy enough to understand and use right away. SPREADSHEET combines a full-featured spreadsheet with basic word processing functions and the sorting and searching capabilities of a data base. BETTERWORKING SPREADSHEET gives you more features for less money.

- Accesses up to 250 rows by 100 columns.
- Offers over 30 mathematical functions from simple addition to square root and trigonomic functions.
- Consolidates separate spreadsheets.
- Provides on-line help screens.
- Offers 40- or 80-column on-screen capability.
- Uses conditional "if . . . then" statements.
- Offers variable column widths.
- Creates graphic displays of results.
- Basic word processing capabilities.

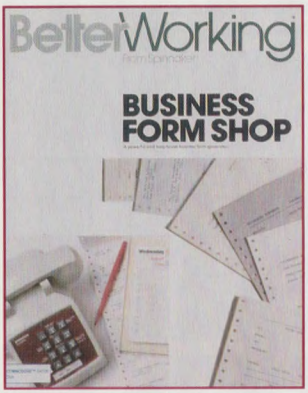
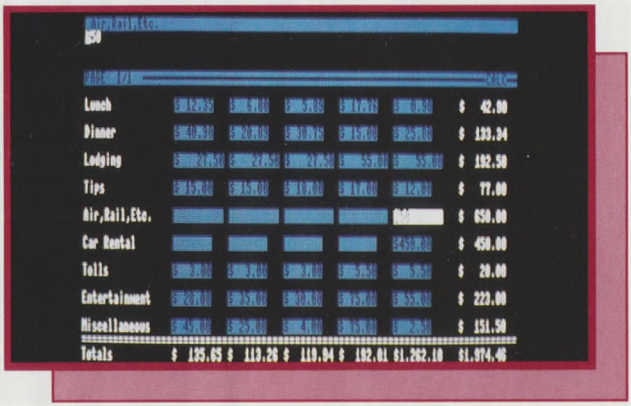
Create customized business forms with the ability to extend and calculate figures.

BETTERWORKING BUSINESS FORM SHOP





Create and process a wide variety of forms to suit all your business needs.

BUSINESS FORM SHOP is the perfect program for any business person whose job requires producing attractive-looking, accurate and legible business forms. With only a few keystrokes, you can quickly and easily design, fill-in and print a wide variety of professional forms including invoices, purchase orders, expense reports, W-2 forms, call reports, financial statements and many more.

With BUSINESS FORM SHOP you can custom design your own business forms. To begin, you create a form template in the full page editor. Your form can be up to 100 pages long and vary in its page dimensions. You define what and where information will appear on the form.

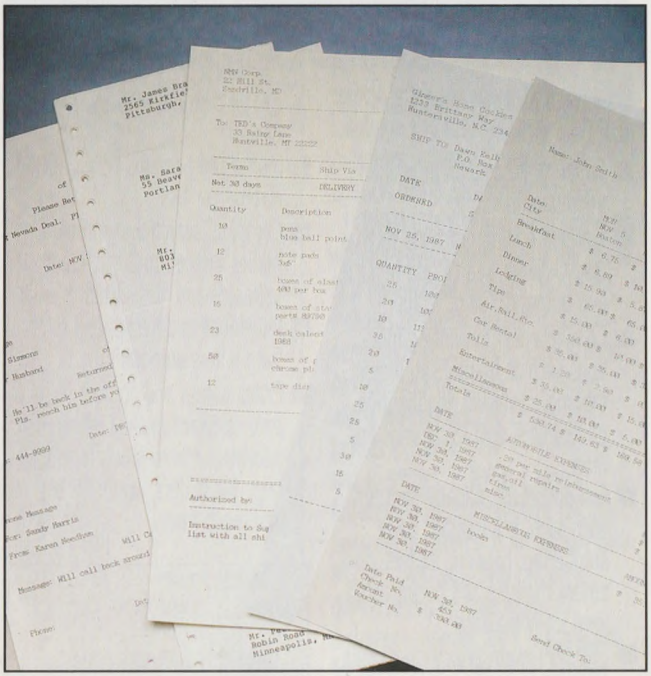
In addition, you can input value constants, such as your sales tax rate. Or mathematical formulas for performing calculations. For example, price times quantity equals extended price. Then save your form template for future use or fill it in immediately to generate a completed form.

No matter how you use BUSINESS FORM SHOP, once you set up your form template, anyone in your business can fill-in and print a perfect form the first time and every time they use the program. Simply load your custom designed form template and input the appropriate item descriptions, quantity, cost, etc. The program automatically performs all the calculations based on the

formulas you have entered. And then you're ready to print your completed form. BUSINESS FORM SHOP is just that simple and that powerful.

BUSINESS FORM SHOP provides all the tools you need to create, fill in and print professional business forms including:

- An easy-to-use on-screen editor that allows you to custom design your own business form templates.
- A library of ready-made business form templates including an invoice, shipping label, file card, expense report, purchase order and more.
- Offers spreadsheet math functions, including such numeric formats as percents, fixed decimals and commas for performing calculations.
- A data base function that automatically retrieves information required to complete a business form, such as unit price, bill-to-address and item descriptions.
- Support of 80 column display and most popular printers.
- No copy protecting so making back-up copies is hassle free.



"I really cannot express the pleasure I sensed as I began to use this program and began to realize its simplicity and yet its magnitude of usability! . . . I was able to put together an invoice that would allow me to enter hours worked by subcontractors working for me and then allow the program to tabulate the cost per job, run a sub-total, deduct the 8% for Workmens Compensation Premiums, enter allowances from the keyboard and get the total due. My invoicing to my general contractors is now only taking me about 20 minutes as opposed to about 2.5 hours before . . . Thank you for a truly magnificent piece of software."

WORDPRO 128 WITH FILEPRO 128 is a value-packed, integrated productivity package that's perfect for all the needs of most Commodore™ 128 users at home or business. It's two complete, yet integrated products in one package—an easy-to-use, professional quality word processor and a complete data base and report program.

WORDPRO 128 and FILEPRO 128 interchange data to allow automatic generation of mass mailings from address records and customized reports and documents. Both support over 100 printers and utilize all the advanced capabilities of the Commodore 128 computer, including 80 column display and additional memory.

- Supports 80 column display and additional memory.
- Full text editing functions such as insert, delete, search and replace, and automatic word wrap.
- Complete text formatting functions such as margin set, indent, tabbing, centering, highlighting, underlining, double columns and more.
- Full document management functions such as automatic page numbering, headers, footers, document chaining and personalized form letter mailings.
- 100,000 word spellchecker which can be customized to meet your needs.
- Stores and accesses up to 4,000 records per file.
- Complete search and sort capabilities with up to 20 different variables and files sorted in order.
- Individually addresses and prints form letters automatically.
- Prints names and address files onto standard mailing labels, text information onto labels for price tags, file folders, inventory tags and much more.

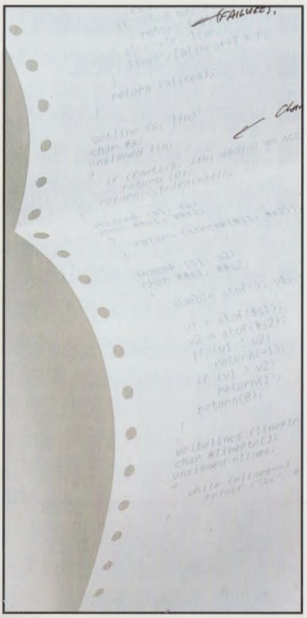
Welcome to the future of programming... POWER C is a true C language compiler.

BETTERWORKING POWER C



The use of the C programming language is one of the most important developments in the micro-computer industry. C combines the productivity of high level languages with the control of low level machine languages. There are many reasons for using C: it executes ten times faster than BASIC, it's structured so that programs may be written more quickly, and programs written in C can be easily transported to other computers. For these reasons, C has rapidly become a major computer programming language and most serious micro-computer software development today is being performed in C.

POWER C is a true C language development environment with a full range of programming features. POWER C includes complete language components such as a C shell, a full screen syntax checking editor, a compiler and a linker. Plus two complete libraries including over 95 functions and C utilities. POWER C offers full support of floating point calculations and conforms to Kernighan and Ritchie standards. Two complete development environments are included—one for the C-64 and one for the C-128. POWER C's tutorial section will help get you started. Now you're on your way to faster and more effective programming.

- Native machine language object code which is more than ten times faster than BASIC.
- Complete language components such as C shell, full screen syntax checking editor, compiler, linker etc.
- Complete library of over 95 functions.
- Complete library of C utilities including such utilities as sort, find, and a powerful text formatter.
- A tutorial to get you started.
- Full support of floating point.
- Conformation to Kernighan and Ritchie standards.
- Un-copy protected disks so back-up copies are hassle free.
- Two complete development environments-one for the C-64 and one for the C-128.

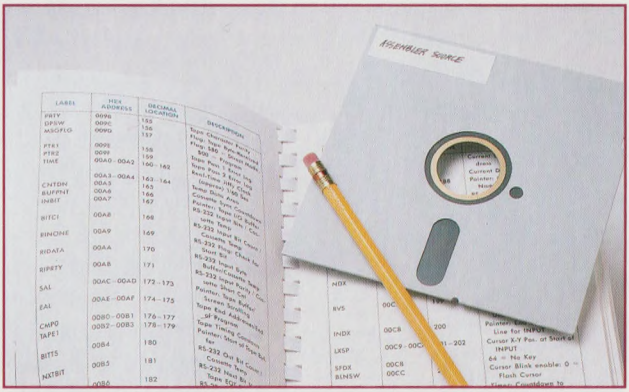
The first professional quality assembler for both the Commodore 64 or Commodore 128.

BETTERWORKING **POWER ASSEMBLER**



POWER ASSEMBLER is a very fast and versatile assembler designed specifically for the Commodore. Its rich body of commands and wide range of abilities set the standard for convenience and flexibility in assembly language programming. Capable of assembling itself in under 80 seconds, POWER ASSEMBLER will assemble to disk or to memory. Input to the assembler can come from any combination of memory resident and disk resident files. POWER ASSEMBLER possesses advanced symbol table facilities which support symbols of any length and allows all components of a program to reference all other components of the program using symbols rather than direct addresses.

Plus, with POWER ASSEMBLER a program can be written partially in BASIC for convenience and partially in assembler for speed.

POWER ASSEMBLER comes with a powerful full screen editor to make program input and debugging simple and easy. Also, its full assembly listing provides a complete description of any errors rather than just spewing out error numbers.

- Full screen editor.
- Support of CBM and ASCII printers.
- Assembly to memory or disk.
- Support of separate assembly.
- Compatibility with BASIC.
- Support of conditional assembly.
- Support of long symbols.
- Cross assembly for the Z80 on the C-128.
- Support of four or more Commodore 1541 (or 1571) disk drives.
- Un-copy protected disks so back-up copies are hassle free.

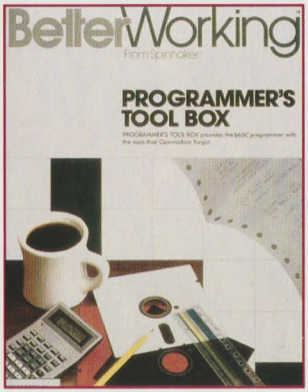
PROGRAMMER'S TOOL BOX provides the BASIC programmer with the tools that Commodore forgot.

BETTERWORKING PROGRAMMER'S TOOL BOX



PROGRAMMER'S TOOL BOX will help you develop code faster and easier than ever before. It automates programming tasks by providing you with a complete set of high-convenience, high-productivity tools. PROGRAMMER'S TOOL BOX includes a relocatable assembler for the Commodore as well as an indispensible BASIC TOOLS package which turbo-charges resident BASIC with dozens of useful new commands like MERGE, UNDO TEST and DISK as well as the old standbys such as RENUMBER and SEARCH & REPLACE.

With PROGRAMMER'S TOOL BOX a program can be partially written in BASIC for convenience and partially in assembler for speed.

- A full what-you-see-is-what-you-get editor with good string search and replace facilities.
- A tracing facility and error analyzer that makes debugging fast and easy.
- Debugging commands that radically reduce development time.
- Keyboard macros.
- Ability to scroll through your program in either direction.
- Automatic line numbering, line range deletion as well as variable display and editing.
- Facilities for expansion and compatibility with other packages.
- Un-copy protected disks so back-up copies can be made hassle free.
- Ability to write programs better, faster and more easily; changes and updates become a snap!

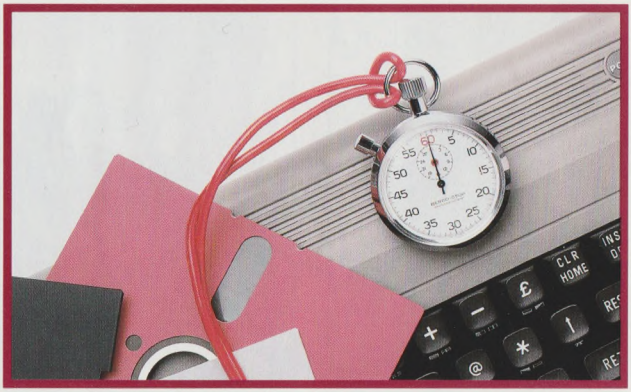
Turbo charge your program's performance.

BETTERWORKING TURBO LOAD and SAVE



TURBO LOAD AND SAVE cartridge turbocharges the loading and saving process by as much as 500%. Just plug it into the cartridge port of your Commodore computer and it will load your disks with speed and ease. In fact the longer your program, the more improvement you'll see.

And, unlike other fast load cartridges, TURBO LOAD AND SAVE saves data to disks five times faster as well. No other fast load cartridge offers this feature—or even comes close. Whether you're saving text for word processing, numbers for spreadsheets, records for your data base or code for your programs, the fast save feature will help you as much as the fast load feature does.

But that's just for starters. With TURBO LOAD AND SAVE, you can eliminate the drudgery from disk operations with fast back-up, fast copy, and fast format. And finally, programmers will enjoy the powerful and time-saving disk oriented commands of Basic 4.0 which add power and flexibility to programs.

The TURBO LOAD AND SAVE cartridge works with most programs, even copy protected ones, including the most popular computer games. So why test your patience waiting for programs to load and save? Turbocharge them with TURBO LOAD AND SAVE!

- Loads programs from disk up to 500% faster!
- Saves data to disk 500% faster!
- Copies and formats 500% faster!
- Easy to use, just plug into your computer!
- Includes powerful and time-saving disk commands of BASIC 4.0.
- Single commands allow you to easily and quickly list directories, copy, format, and organize disks.

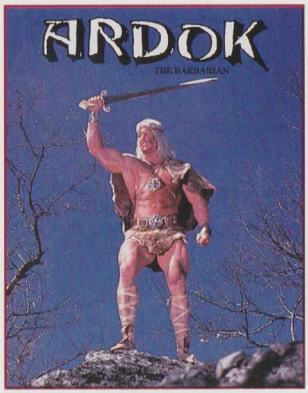
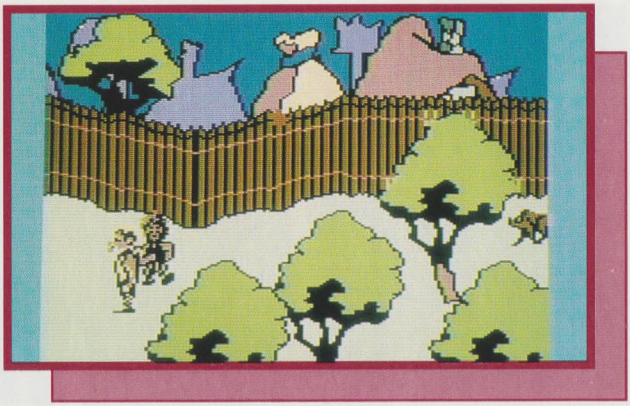
Fierce. Loyal. Barely tameable.

ARDOK THE BARBARIAN





The year is 50 B.C. The Romans are methodically razing villages and enslaving the inhabitants. Only the people of Gaul remain to be conquered. And they are threatened . . .

At one time the Gauls possessed an elixir which made them invincible. However, the magic cauldron containing the potion accidently exploded sending seven chards deep into Roman territory. The potion may only be made in the magic cauldron and without sufficient supply of potion, the Gauls will be destroyed.

Now it was time for a decision. The elders gathered to choose the one person most likely to successfully enter enemy territory and retrieve the remaining pieces.

The elders choose you, Ardok, the barbarian. Barely tameable, you are fierce and loyal to the Gauls. You depart on your journey accompanied by your faithful companion, Bogg, and search Roman encampments where you battle gladiators and centurions. This is rugged hand to hand combat. Ardok shows no mercy and fights to the death. You have but one potion of elixir to help you fight. You decide when to take that dose.

- Full three dimensional movement
- Fifty screen scrolling world to explore
- Enlarged full body fighting mode with many fighting moves
- Best graphics you'll ever see

- As many as 15 different attackers on any one screen

BAZOOKA BILL is a one-man battalion equipped with every heavy duty armament you can imagine. This Soldier of Fortune is armed to the gills with throwing knives, a machine gun, flame thrower, bazooka and missile-firing jet fighter. With this formidable array of weaponry—and if all else fails, his two hard driving fists—Bazooka Bill fends off a relentless stream of enemy soldiers, tanks, trucks, and aircraft.

But as well as developing the lightning reactions needed to combat enemy attackers, the player will also need to plan his strategy carefully, as Bazooka Bill moves across over 100 screens of mappable enemy territory.

Addictive, fast and furious. Bazooka Bill combines elements of speed, strategy and excitement. The scrolling screen requires super-fast reflexes to cope with the relentless action and the colorful cartoon style graphics make for superb entertainment.

HAIII-YAAAAH!!!

KUNG-FU The Way of the Exploding Fist

"As head-to-head karate contests go, KUNG FU not only delivers top-quality arcade action, but also strives to capture every nuance of sight and sound."
Commodore Microcomputers Magazine

You have been kidnapped and taken to a small island off Okinawa, Japan. The head of the largest remaining Ninja sect has summoned you to fight or die. As a Kung-Fu master, you must use all of your skills in order to survive.

An elite inner cadre of the dark master's fighting force will challenge you using the most advanced techniques of the martial arts—flying kicks, jabs to the face and somersaults. If they succeed, the Ninja will have triumphed over the ancient Kung-Fu masters.

But you know THE WAY. You have not been corrupted by the dark master's twisted use of Kung-Fu as a weapon of destruction. The battle lines are clearly drawn, the rest is up to you.

- One or two player action
- Oriental background music
- Realistic sound effects
- More than 15 different moves, including somersaults and roundhouse kicks
- Extremely smooth animation, with dazzling graphics and fast game play

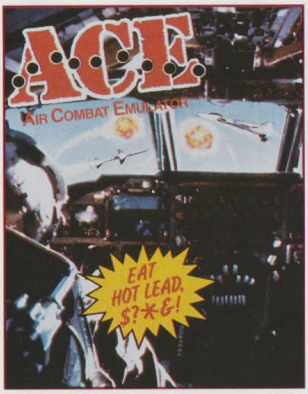
The most fun you can have on the ground.

ACE Air Combat Emulator



"ACE (Air Combat Emulator) lets you experience the challenge, thrills and danger of modern warfare at twice the speed of sound in a Mark 2.1 combat jet. And believe me, after you've dueled with a skillful foe at 30,000 feet, you'll be glad it was only that—a simulation."

Commodore Microcomputers Magazine

"If there's one word to describe ACE, *it's fast.* You'll find the high-speed, three-dimensional graphics truly amazing."

Compute's Gazette

Air raid sirens wail as dawn breaks. You board your jet, and a shiver runs through your spine as you realize that the future of the free world hangs in the balance.

Seconds later, you're airborne, headed for the moment you've trained for all your life. The on-board computer warns you of enemy aircraft 5,000 feet overhead. As you effortlessly roll your aircraft and head for the encounter, you hear the explosions of Surface-to-Air missiles. The tank forces have found you!

Immediate evasive maneuvers are your only chance. Suddenly, you are free of the tanks. As you burst through the cloud cover, you surprise three enemy delta wing fighters. Instantly switching the weapons mode to Air-to-Air missile, you easily outmaneuver the enemy and line him up in your sights: Eat hot lead, $?*&!

- One or two pilots
- Every mission is different
- Tremendous sound capability
- Multiple weapons systems
- Easy to use control panel
- Real-Time Overhead Satellite Mapping
- Realistic digitized human speech

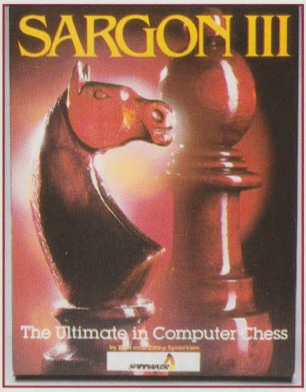
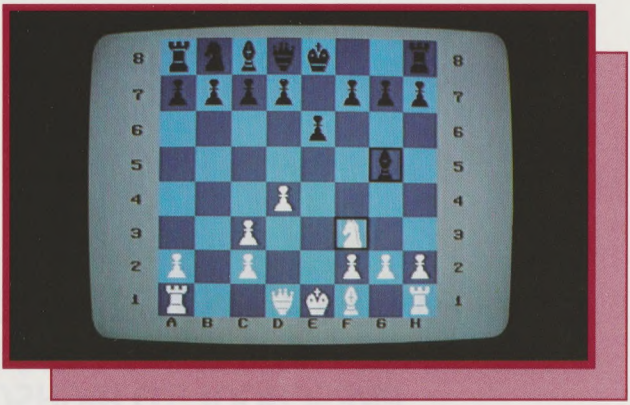
Nobody's perfect ...

SARGON III





"This chess program plays well enough to beat about three-fourths of the members of the U.S. Chess Federation."

Games Magazine

"If you are going to lose, you might as well lose to the best: Sargon."

PC Magazine

"This is the finest chess program on the market."

Family Computing Magazine

YOU CAN'T WIN THEM ALL.

We pitted Sargon III, the world chess champion, against the challenger. Head to head, with no punches pulled. And believe it or not, the champ lost one game to the challenger. But Sargon III beats Chessmaster 2000 almost everytime.

Sargon III is the result of more than twenty one man years of development. Sargon III will play at precisely the level of difficulty you desire. Ask Sargon III for a hint, take back a move you've already made, replay a sequence, change sides, or set up your own board for customized learning. Sargon III lets you study in detail more than 100 great games of history or review 45 classic chess problems, all on screen. Sargon III also includes the largest library of opening moves available on any chess program.

SARGON III WRITES CHESS HISTORY.

In a tournament sanctioned by the U.S. Chess Federation, Sargon III beat a master rated 2209. That makes Sargon III the only microcomputer program ever to defeat a player at that level.

Sargon III has no trouble wiping Chessmaster 2000 off the globe. Someday, maybe a chess playing program will be able to beat Sargon III. Until then, which chess program do you want to own: the world champion or the runner-up?
